## Environmental Policy

Based in Sussex, the environmental management consultancy ESHCon was established in 2006 to help organisations manage their impacts and find commercial benefits from this.

We acknowledge that our day-to-day business practices do have some environmental impact and are committed to managing these. We also regard the work we do with clients as a positive impact, the cumulative effects of which far outweigh our own direct impacts.

We aim to be a responsible corporate citizen that leads by example when it comes to protecting the environment. We are committed to the prevention of pollution, we will fulfil our compliance obligations and strive for continual improvement to enhance environmental performance.

We will regularly calculate our carbon footprint to understand the sources of our emissions and minimise the creation of wastes and pollution. We will, therefore, manage our processes, materials and people to reduce the negative impacts associated with our work and contribute to positive environmental improvements. We seek absolute reductions in environmental impacts as well as relative improvements.

Our Environmental Policy provides the framework for setting and reviewing environmental objectives. It is documented, regularly reviewed, maintained and communicated to interested parties.

Our main environmental objectives are to:

- Minimise our greenhouse gas emissions
- Reduce the impact of our transport, by reducing the need to travel and choosing alternative transport options
- Reduce our energy requirements and improve energy efficiency
- Manage our waste, by minimising, storing, recycling and disposing of waste responsibly
- Consider the use of materials and products with a lower environmental impact
- Work with our clients, and other contactors, to understand and reduce their own environmental impacts.

This policy and our achievements will be communicated to parties interested in our environmental performance.
